Auto-Block Maker

ColgosBlock

The one of the Colgos product family for block production

How does Block Maker Works

The ColgosBlock is ideal for premium book-on-demand products such as photobooks or children and promotional books. Both sides of the book are completely flat. With this type of binding visual information is not lost in the gutter and two-page spreads are fully visible. The book's pages do not turn over automatically as with other bindings. This lay flat technology is capable to produce book blocks, independent of substrate being utilized. The basic machine consists of:

- Lay flat binding(Fan binding) technology for photobook
- Automatic feeding and positioning of sheets and card boards
- Integrated glue station (hot-melt glue)
- Net gluing head, Patent technology, non-blocking
- Sheets creasing and folding in stations
- Forming and twice pressing in stations
- Only one operator required
- Rapid, fully automatic
- Simple to operate and Easy to use
- State-of-the art software control
- Attention to detail design, clear overview to each machine work station
- Minimal floor space required
- Extensible modular design, On-demand customization in speed and finished case size.
- Stacker/Collector with Lift and Move Function

Special Features

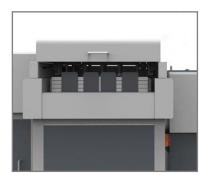

INTUITIVE OPERATION

The 10.2" touch screen allows operators to set job programs and run the machine intuitively.

PATENTED FEEDING MECHANISM

The patented "Dual-Suction-Swing Feeding Mechanism" reduces risks of double feeds and mis-feeds drastically, therefore it prevents paper jams and enhances productivity. high-precision creasing and folding sections.

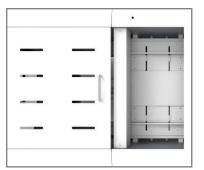

SERVO POSITIONING

Automatic feeding and positioning of card boards with Servo positioning. The Dual-Suction-Swing Feeding Module is optional.

PATENTED GLUE STATION

Integrated glue station (animal glue) and patented net gluing head. non-blocking and redundant glue recycling system.

FORMING OG BOOK BLOCK Forming of book block and pressing mechanism with "Self--Adapting-Block Forming Positioning".

AUTOMATIC STACKER /COLLECTOR

The stacker is light weight and easy to move. Engineered to auto-lifting for different stock and sizes of finished pieces. Convenient transshipment to other stations. **Technical Specifications**

Model	CG-500	CG-800
Finished block size(max)	310x220mm	330x400mm
Finished block size(min)	160x160mm	160x160mm
Spine thickness	Max. 30mm	Max. 60mm
Speed	Up to 720 s/h(standard)	Up to 720s/h(standard)
	Up to 1800 s/h (extend	Up to 1800s/h (extend
	multi-modular)	multi-modular)
Control	Touch Screen	
Gluing modular	Net gluing head	
Pressing modular	Mechanical+ Rollers	
Creasing modular	yes	
Folding modular	yes	
Paper feeding modular	Vaccum feeding	
Paper thickness	120-300gsm	
Boards feeding modular	Servo-feeder	
Board thickness	0.3-3mm	
Collector	Optional	
Dimension	W3155xD980xH1380mm	W3655xD1180xH1380mm
N.W.	About 1150kgs	About 1470kgs
